

University of Rajasthan Jaipur

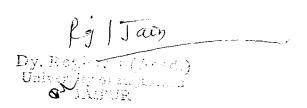

SYLLABUS

M.Sc. GEOLOGY

(Annual Scheme)

M.Sc. (Previous) Examination 2023

M.Sc. (Final) Examination 2024

Ordinance governing the examinations in the ther of Arts, Fine Arts, Social Sciences, Science. minimize and Law are contained in a separate booklet statents are advised to refer to the same.

Changes in Statutes/Ordinances/Rules/Regulations! Solute and Books may, from time to time, be made by are addition or re-making and a candidate shall, except the district the University determines otherwise comply with any change that applies to years he has not multical at the time of change.

all court cases shall be subject to the jurisdiction of the Hajasthan University headquarter at Jaipur only and not any other place.

> University of Rajasthan, Jaipur whithed by Shiv Book Depot, Jaipur for University of Rajasthan Finted by Harish Printers, Jaipur

SCHEME OF EXAMINATION

(Annual Scheme)

Each Theory Paper Dissertation/Thesis/ Survey Report/Field Work, if any.

3 Hrs. Duration 100 Marks

100 Marks

1. The number of papers and the maximum marks for each paper/ practical shall be shown in the syllabus for the subject concerned It will be necessary for a candidate to pass in the theory part as well as in practical part (wherever prescribed) of a subject/paper separately.

2. A candidate for a pass at each of the Previous and the Final Examinations shall be required to obtain:

(i) Atleast 36% marks in the aggregate of all the papers prescribed for the examination, and

(ii) Atleast 36% marks in practical(s) wherever prescribed at the examination, provided that if a candidate fails to secure atleast 25% marks in each individual paper at the examination and also in the dissertation/Survey report/field work, wherever prescribed, he shall be deemed to have failed at the examination notwithstanding his having obtained the minimum percentage of marks required in the aggregate for that examination. No division will be awarded at the Previous and the Final Examination. Division shall be awarded at the end of the Final Examination on the combined marks obtained at the Previous and the Final Examination taken together, as noted below:

of the aggregate marks taken First Division together of the Previous and Second Division the Final Examination.

All the rest will be declared to have passed the examination

3. If a candidate clears any Paper(s)/Practical(s)/Dissertation prescribed at the Previous and/or Final Examination after a continuous period of head years, then for the purpose of working

> (Academic) Aversky of Rajasthan

set has division the minimum pass marks only viz. 25% (36% in practical) shall be taken into account in respect of Practical(s)/Dissertation are cleared after the expiry that in case is a second of three years; provided that in case a candidate required more than 25% marks in order to toward the minimum aggregate as many mark out of those actually the like him will be taken into account as would enable him the deficiency in the requisite minimum aggregate.

: Obssertation/Survey Report/Field Work shall be typeand the submitted in triplicate so as to reach the office of the arteast I weeks before the commencement of the theory Only such candidates shall be permitted to offer Field Work/Survey Report/Thesis (if provided in are of examination) in lieu of a paper as have secured marks in the aggregate of all the papers prescribed revious examination in the case of annual scheme the number of papers in which a candidate actually appreciate the examination.

B New-codeplate candidate are not eligible to offer dissertation as per provisions of O. 170-A.

M.Sc. (GEOLOGY)

Total Marks of M.Sc. Previous 600

Each of the following theory papers shall be of 60 marks M.Sc. Previous

A. Theory Papers:

Mineralogy, Crystallography and Geochemistry Paper I Paper II

: Environmental Geology, Geomorphology and

Hydrogeology.

Structural Geology and Tectionics Paper III

Paper IV Palaeontology

Sedimentology and Principles of Stratigraphy Paper V Precambrian Geology and Stratigraphy of India Paper VI

B. Practical and Fieldwork:

Part-A 100

Part-B 115 (This includes 25 marks of the field as mentioned in para 'D')

C. Seminar Presentation. 25 marks

Seminar presentation shall be evaluated by the following committee:

(i) Head of Department

(ii) Supervisor

(iii) One member to be appointed by the Head on the basis of seniority.

D. Field Work:

(i) Mapping

15 Marks

(ii) Gen. Field Work

10 Marks

M.Sc. Final

Total marks of M.Sc. Final 625

A. Theory Papers of 75 Marks each

Paper VII : Resource Geology

Igneous and Metamorphic Petrology Paper VIII Paper IX Remote sensing and Exploration geology

Elements of Engineering Geology, Mining Geology Paper X

and One Dressing

B. Paper XI: Project oriented Dissertation

Dissertation shall carry 100 marks and shall be evaluated by one external and the internal examiner

C. Practical: Part-A: 125 Marks

Part-B 100 (This includes 30 marks of the field on

mentioned in Para 'D')

D. Field Work: (i) Mining Training 15 Marks

(ii) Gas Field Training: 15 Marks

M.Sc. : GEOLOGY (PREVIOUS)

Vineralogy, Crystallography and Geochemistry
The paper will contain nine questions having three
meach section, candidates are required to attempt five
an selecting at least one question from each section.

Section-A

Thirty two minetry and their derivation. Twinning type and laws, thrustion, Brags law The powder and single crystal method of the powder and single crystal method in the powder and single crystal method in biaxial crystals. Use of Universal stage.

Section-B

The mand polymorphism, classification of silicates, study and deptical properties of important rock forming minerals confidence, chemical composition, crystal structure, properties work, association of the following mineral families therein Property, amphibole Garnet, Feldspar, Mica, Alumino-mand other important rock forming minerals.

Section-C

their abundance and application, trace and rare their abundance and application, Isotope Geochemistry, their abundance and application to geological systems and their K-Ar, U-pb and Sm-Nd systematics.

Praduci

Maneralogy:

Description of minerals by microscopic examination.

Description of optical characters of important rock forming miletals under microscope.

- Crystalle graphy:

the direction and description of crystal model in hand specimen crion of stereographic projection and determination of the in in problems related to stereographic projections.

Calculation of mineral formulae and presentation total data

How de mmerded:

Coase, F.A. and Zussman J., 1996. The Rock Forming Minerals

Copical Mineralogy, New York, McGraw Hill to Nonre C.B., 1991. Introduction to geochemistry, Wiley Eastern Hillmout, In C.S., 1993. Mannual of Mineralogy John Wiley 1992. Introduction to Mineral Sciences. Cambridge University

1995 Mineralogical Phase Equilibria and Pressure - Temperature

28. 1974: Laboratory Handbook of Petrographic Technique

Note: The paper will contain nine questions having three question from each section. Candidates are required to attempt five questions in all selecting at least one question from each section

Section-A

Concept and definition of Environmental Geology, Major Ecosystem (Atmosphere, Bioshpere, Hydrosphere and Lithosphere): Major environmental issues on global, regional and desertification. Natural hazards: risk perception, vulnerability zonation, adaptation and mitigation. Mineral and energy resources of India: their exploitation and impact on environment; Environmental Impact, Assessment; Environmental Management Plan, Environmental Audit, environmental regulations in India. Pollution and waste disposal; heavy metals and biogeochemical cycles; geological factors and human health. Concept of emerging Environmental Management System (EMS).

Section-B

Geomorphic processes and resulting landforms. Landforms their types and relationship with structure and tectonics their role in mireral and ground water exploration. Morphometry, slope, type and its development. Soil and its types; soil erosion and its conservation terrain evaluation for strategic purpose. Landforms of Thar desert.

Ground water-its origin, types, importance, occurrence, movement and uses; ground water in hydrological cycle Aquifer properties ground water flow and Darcy's law; geo-environmental control or ground water, ground water provinces in India with special reference to Rajasthan. Ground water pollution; ground water development and management; artificial recharge of ground water, ground water sustainability; basic concept of ground water modelling.

Practical

EIA and EMP formulation for mining, industrial and urban area Delineation of vulnerable and hazardous zones; identification and siting of geologically safe inhabitation zone, safe waste disposal zone and rain water harvesting structures. Identification of present and past environment of deposition and accumulation of resources Presentation of chemical analyses data and plotting of chemical classification diagram. Study and identification of seismic, flood and drought prone areas. Classification of ground water for use in drinking irrigation and industrial purposes, Watershed delineation Morphometric analysis. Interpretation of ground water table and ground water contour maps. Plotting ground water basins of India Books Recommended:

388 Geomophology

Farier-III: Structural Geology and Tectonics

The paper will contain nine questions having three in each section, candidates are required to attempt five in selecting at least one question from each section.

Section-A

Manufaction principles and behaviour or rocks. Types of strain and adaptive and dimensional stress analyses. Primary and the artificial sedimentary structures and penecontemporaneous and process.

Section-B

Fractures and joints. Their nomenclature, age relationships, origin and significance. Causes and dynamics of faulting-normal, strike slip, and tree. Thrust/nappe,

Flamm and linear fabrics in deformed rocks; their chronology

t sun and significance.

the accept of stereographic projection of fabric elements and its in π (8 and π diagrams).

Section-C

Shields, Platforms, Mountain chains, Rest valleys, stands ares and Ocean basins.

Free the theories; types and characteristics of Plate margins.

The theories types and characteristics of Plate margins.

The theories types and characteristics of Plate margins.

The theories types and characteristics of Plate margins.

Wat the all

Since the structural problems by stereographic and orthographic Sincetural analyses with stereoner.

at an and interpretation of geological maps, outcross and sectural problems concerning comomic mineral deposits.

and plotting of field data. Plotting and interpretation of the same and resultant diagrams. Study of large scale tectonic tables of the Earth.

Paper-IV: Palaentology

Note: The paper will contain nine questions having three questions from each section, candidates are required to attempt five questions in all selecting at least one question from each section.

Section-A

Evolution: mechanism, evidences and theories.

Classification: taxonomy and species nomenclature. Paleoecology:

(a) Fundamentals

b) Palaeoenvironment: physical parameters and various approaches of reconstruction.

(c) Taphonomy, taphocoenosis, thanatocoenosis, time-averaging/condensation shell-beds and biostrationmy.

(d) Falaeoecological interpretation and its application

Section-B

Application of the following groups of fossils in stratigraphy and stratigraphic correlation/ reconstruction of palaco environment:

Algae (Calcareous/Sileceous): Coccolithophore, Stromatolites, Dinofiagellates, Halimeda, Diatoms, Pollen grains and spores, Foraminifers, Radiolarian, Sponges, Corals, Serpulids, Trilebites, Ostracodes, Monomplacophora, Gastropods, Nautiloids, Ammonoides, Belemnoides, Lamellibranchs (with functional morphology), Brachiopods (with functional morphology), Hyoliths, Bryozoans, Echinoids (with functional morphology), Crinoides, Graptolites and Conodonts.

Section-C

Ichnology: Classification, description of common Inchnogenera, application.

Gondwana Flora: Systematic study of important Gondwana Plants, bearing on palaeoclimate. Evolitionary history of man, elephant and horse.

the control is compulsory and students not taking part in the mail not be allowed to appear in the examination.

M. Sc. FINAL GEOLOGY

Paper - VII: Resource Geology

The paper will contain nine questions having three questions and section, candidates are required to attempt five questions associated at least one question from each section.

Section A

Months and its relation with mineral deposit. The development the rode reshores of ore formation, Classification for ore deposits. Accesses of ore formation magmatic concentration, contact metals in drothermal, Residual and mechanical concentration, secuments on metamorphism, supergene enrichment, Bacteriogenic, and metals exhalations, Stratabound and Stratiform ore deposits. Final mainsion in ores: Principles, assumptions, limitations, and applications.

Strady of Stable and unstable isotopes in relation to ore deposits.

Section B.

This desired culturence of ore bodies - morphology and relationship to hast their Textures, Paragenesis and Zoning of ore and their confidence concept of ore bearing fluid and deposition of ore. Their wight, that steen, Wall-rock alteration, Structural and stratigraphic matter of of ore localization. Metallogenic provinces and epochs

Matter Sis in relation to Plate tectonics Metallic mineral mode of occurrence, use and distribution in India of mineral mode. Cand-Zine, Aluminium, Iron, Managese and Chromium. Section C

is faction and origin of Coal, Rank grade and type of the harmonic International Classification Geological and geographical action of Coal deposits in India, Detailed geology for some transaction fields of India.

its nature and composition. Origin and magration condary) of Oil and gas. Characteristics of Reservoir (structural & stratigraphic) geology of oil bearing

basins of India, position of oil and natural gas in India, future prospects and the ecomomic Secnario.

Atomic Fule: Mode of occurrence Distribution of atomic minerals in India. Brief outline of the following important deposits; Bushveld chromite kuruko deposit iron Porphyry copper deposit. Practical:

Megascopic study of structures and fabrics of different minerals and their associations. Mineralogical and textural studies of common one minerals under ore-microscope and petrological study of other industrial and nonmetallic minerals. Diagrammatic representation of open cast and underground mining. Exercises on mine sampling and determination of tenor, cut-off grades and one reserves. Books Recommended:

 Paper VIII: Igneous & Metamorphic Petrology

Note: The paper will contain nine questions having three question from each section, candidates are required to attempt five questions in all selecting at least one question from each section.

Section A

Magma - Origin and emplacement; factors affecting magma generation, differentation and Assimilation Mineralogical, chemical and tectonic classification of igneous rocks; principles of IUGS systematics.

Crystallization of silicate melt-phase rule, crystallization behavior of albite-anorthite; albite-orthoclase; Forsterite-silica; Naphelene-Kalsilite-silica, Quartz-Albite-Anorthite-Orthoclase.

Section B

Petrography, mode of occurrence, classification and petrogenesis of granites, alkaline rocks, anorthosites, pegmatites, lamprophyre, basalt, ultramafic rocks and roks suites

Metamorphism, its limits and variables. Phase rule and phase diagrams: ACF, AKF and AFM; their application in understanding mineral paragenesis and parentage.

Section C

Metamorphic zones, facies and grade, fabric and mode of occurrence of metamorphic rocks. Facies of low pressure (comact metamorphism) and of medium pressure metamorphism-greenschist, amophibolite and granulite. Facies of high pressure (ecologite and blue schist facies). Origin of migmaties in light of experimental studies. Origin of charnockites. Elements of Geothermometry, P-T paths of regionally metamorphosed rocks. Metamorphism and crustal
